OUR COMPANY

Data Business GmbH was founded in 2016 to serve global market with data engineering related services and products. Our focus is on solutions in the areas of data lakehouse architectures, data engineering, analytics and enterprise resource planning using SAP® products like SAP® S4/HANA, SAP® BW4/HANA and Open-Source technologies. As a project partner or interim service provider, we offer you customized and coordinated IT services and solutions with expertise and passion. Together we find the right solutions for your individual challenges. We also deliver solutions for business rules and decision management with Low-Code & No-Code approach.

DATA ANALYTICS

With decades of experience, Data Business offers cutting-edge analytics services. Our team of skilled analysts and scientists collaborates with clients to craft data-driven strategies aligned with business objectives. Utilizing the latest tools and techniques in combination with open-source technology, we extract actionable insights from data, empowering clients with real-time visibility into business performance through concise reports.

DATA ENGINEERING

We stand out as an industry leader in data engineering. Our commitment to develop state-of-the-art data platforms is evident in tailored solutions for clients. These solutions enable clients to make informed decisions and drive business growth, reflecting their dedication to delivering exceptional outcomes.

DATA SCIENCE & AI

We are passionate in data science, leveraging advanced technology and techniques to provide clients with actionable insights. Our scientific approach transforms vast datasets into meaningful information, supporting better decision-making. Whether it's data mining, machine learning, or big data analytics, our experts have the skills to help clients achieve their goals.

DATA PLATFORM SOLUTIONS

We specialize in delivering cutting-edge data platforms Cloud & On-Premise, offering options to cater to businesses of all sizes and industries. Our experienced team designs and implements data platforms tailored to clients specific needs, ensuring data security, efficiency, and effectiveness. We bring together the best of breed solutions tailored to your data science and analytics needs.

CONSULTING

In today's rapidly evolving business landscape, staying competitive and relevant requires not only data-driven decision-making but also a strategic approach to harnessing the value of data. We understand the challenges that businesses face when it comes to managing and leveraging their data assets. That's why we offer a comprehensive suite of consulting and advisory services designed to empower our clients and drive their success.

- Digital Transformation Consulting
- Data Science Empowerment
- Business Rules Management
- Training and Workshops
- Product Evaluations
- Proof of Concepts
